Nonmetallic Tubing - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4720-01-556-1296

## **Cross Sectional Shape:**

Round

**Inside Diameter:** 

0.188 inches

## **Outside Diameter:**

0.312 inches

#### End Application:

Tva-1000 (0hts3), toxic vapor analyzer

#### Inside Surface Condition:

Smooth

Product Name:

(inavy) tygon tubing

#### **Special Features:**

Good chemical resistance; non toxic; nearly colorless walls are very smooth therefore resisting abrasion and dontamination; ideal for

condensors, incubators, desiccators, gas lines and drain lines, for all types of chemicals and gases and liquids

#### Material:

Plastic tube

### Supplementary Features:

Tubing material is clear, resilient, comparable to rubber in toughness, flexibility and dielectric strength; wall thickness is 0.062 inches; this model is 50 feet in length (600 inches)

#### Shelf Life:

N/a

#### Unit Of Measure:

---

#### Demilitarization:

No

#### Fiig:

A54200
