Cross Sectional Shape:

Round

Minimum Inside Bending Radius:

40.0 millimeters

End Application:

Lp-90 compress

Measuring Method And Length:

344.0 millimeters working and 346.0 millimeters working

Product Name:

Hose, nonmetallic

Special Features:

All internal bending radius r 40; dimensions with bends length 345mm +/-1mm, height 183mm +/-1mm, width 126mm +/-1mm; material sae 20r4 class 01 (135degc/1bar); for use with engine coolant; inner conveying tube style plain

Material:

Rubber

Material Specification:

Sae 20r4 class01 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A541z0
