**Cross Sectional Shape:**

Round

**Wall Thickness:**

Between 4.5 millimeters and 5.0 millimeters

**Inner Conveying Tube Style:**

Plain

**Exterior Color:**

Black

**Inside Width:**

Between 99.5 millimeters and 100.0 millimeters

**Layer Composition And Location:**

1st layer molded rubber, nitrile and outer layer molded rubber, chloroprene

**Inside Surface Condition:**

Smooth

**Measuring Method And Length:**

209.5 millimeters and 210.5 millimeters

**Special Features:**

Made of chloroprene rubber with 5 plies pa- fabric, nbr innerliner; applicable to 120mbar at 80 degrees c

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A541z0
