Cross Sectional Shape:

Round

Wall Thickness:

Between 4.5 millimeters and 5.0 millimeters

Inner Conveying Tube Style:

Plain

Exterior Color:

Black

Inside Width:

Between 99.5 millimeters and 100.0 millimeters

Layer Composition And Location:

1st layer molded rubber, nitrile and outer layer molded rubber, chloroprene

Inside Surface Condition:

Smooth

Measuring Method And Length:

209.5 millimeters and 210.5 millimeters

Special Features:

Made of chloroprene rubber with 5 plies pa- fabric, nbr innerliner; applicable to 120mbar at 80 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541z0
