**Cross Sectional Shape:**

Round

**Inside Diameter:**

0.625 inches

**Outside Diameter:**

0.845 inches

**Inner Conveying Tube Style:**

Plain

**Exterior Color:**

Clear

**End Application:**

Boat, rigid inflatable

**Burst Test Pressure:**

40.0 pounds per square inch single response

**Inside Surface Condition:**

Smooth

**Measuring Method And Length:**

200.0 feet

**Product Name:**

Pvc tubing - clear

**Special Features:**

Tubing is for non-pressurized potable water system supply, drain lines - sinks, showers and ice boxes; tubing is not for hot water or pressurized water systems

**Material:**

Plastic polyvinyl chloride

**Material Specification:**

Single layer fda formula vinyl pvc tubing mfr ref single material response

**Media For Which Designed:**

Water single response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A54200
