Tempurature Rating:
-65.0 degrees fahrenheit and 275.0 degrees fahrenheit single response
Minimum Inside Bending Radius:
3.0 inches
End Fitting Component And Material:
Socket stainless steel all ends
Thready Qty Per Inch (tpi):
12 all ends
Layer Composition And Location:
1st layer plastic, tetrafluoroethylene
Maximum Operating Pressure:
200.0 pounds per square inch
Flow Angle:
45.0 degrees 2nd end
Measuring Method And Length:
12.625 inches
Product Name:
Hose assembly, convoluted polytetrafluoroethylene, low pressure
Thread Series Designator:
Unj all ends
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No

Fiig: A542a0
