|-----------------------------------------------------------------------|
| Tempurature Rating: |
| -65.0 degrees fahrenheit and 275.0 degrees fahrenheit single response |
| Minimum Inside Bending Radius: |
| 3.0 inches |
| End Fitting Component And Material: |
| Socket stainless steel all ends |
| Thready Qty Per Inch (tpi): |
| 12 all ends |
| Layer Composition And Location: |
| 1st layer plastic, tetrafluoroethylene |
| Maximum Operating Pressure: |
| 200.0 pounds per square inch |
| Flow Angle: |
| 45.0 degrees 2nd end |
| Measuring Method And Length: |
| 12.625 inches |
| Product Name: |
| Hose assembly, convoluted polytetrafluoroethylene, low pressure |
| Thread Series Designator: |
| Unj all ends |
| Shelf Life: |
| N/a |
| Unit Of Measure: |
| |
| Demilitarization: |
| No |
