Cross Sectional Shape:

Round

Inside Diameter:

50.0 inches

Min. Tensile Strength (psi):

35 pounds per square inch

Layer Composition And Location:

1st layer braided corrosion resistant steel wire

Outer Covering Environmental Protection:

Chemical resistant

Product Name:

Metal hose assembly

Special Features:

Uses high pressure to form corrugation, minimizing resident stress plus maintains consistent wall thickness throughout hose; fire safety up to 1200 deg. Fahrenheit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A542a0
