Width:

Between 1.240 inches and 1.260 inches

Length:

Between 2.030 inches and 2.050 inches

End Application:

Aircraft engine turbine rear bearing oil suction pump

Perforation Diameter:

Between 0.060 inches and 0.070 inches

Filtering Media Design:

Perforated

Material:

Steel comp 410

Material Specification:

Ams5504 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A523h0
