Chamfer Angle In Deg:

45.0

Overall Length:

1.375 inches

Diameter:

1.125 inches

Thickness:

0.156 inches

Wrenching Facility Shape:

Hexagon

Width Across Flats:

1.375 inches

Male End Thread Class:

2a

Female End Characteristic:

Countersunk

Counterbore/countersink Location:

Both ends

Male End Thread Size:

1 1/4-16

Male End Screw Thread Series Designator:

Un

Male End Thread Direction:

Right-hand

Male End Thread Length:

1.062 inches

Female End Thread Size:

3/4-6

Female End Screw Thread Series Designator:

Acme

Err Default:

Err default

Female End Thread Direction:

Right-hand

Female End Thread Length:

1.375 inches

Criticality Code Justification:

Zzzy

Material:

Copper alloy

Material:

Copper alloy

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T385-l
