End Application:

Various naval applications

Perforation Diameter:

0.062 inches

Bodylength:

10.225 inches

Filtering Media Design:

Perforated single filtering media response

Second Intake Connection Relationship To First Intake Connection:

Identical

First Intake Inside Diameter:

2.500 inches

First Discharge Inside Diameter:

2.500 inches

Special Features:

Y strainer, screening material monel

Material:

Copper alloy screening

Material Specification:

Qq-n-281 cl a federal specification single material response screening

Media For Which Designed:

Any acceptable

Style Designator:

Sump type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
