End Application:

Strainer assembly 3.0 in.

Perforation Diameter:

0.0313 inches

Filtering Media Design:

Perforated all filtering media responses

Special Features:

Strainer size, 3.0 in. Pipe size; cl 250 lb. Flat face flange; body style inline flow - single screen; method of operation manua (handwheel) ;
sight flow stainless steel trim

Material:

Nickel alloy 400 screening

Material Specification:

Astm b148 c95800 assn standard 1st material response body

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A24000
