Thread Direction:

Right-hand head, internal

Pipe Size For Which Designed:

0.250 inches

Maximum Operating Temp:

72.0 degrees fahrenheit

End Application:

8340-01-558-8706, tent

Connection Style:

Inverted flare

Core Depth:

0.688 inches

Drive End Style:

Recessed hexagon

Body Type:

Solid

Thready Qty Per Inch (tpi):

18 head, internal

Maximum Operating Pressure:

150.0 pounds per square inch

Thread Size:

0.250 inches external

Product Name:

Low pressure steel threaded magnetic pipe plug, hex-socket

Material:

Steel or iron cast malleable

Media For Which Designed:

Air and gas, natural and steam and water, fresh

Supplementary Features:

Max pressure: 150 psi at 72f deg, 150 psi at 250f degrees for steam

Thread Series Designator:

Nptf head, internal

Specification Data:

96906-ms-49006 government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A208a0
