Body Material:

Aluminum alloy

Outside Surface Treatment:

Anodized

Stem Material:

Aluminum alloy

Media For Which Designed:

Air and nitrogen, gaseous

Seat Material:

Aluminum alloy

Flow Control Device:

Stem and integral disk

Flow Control Device Material:

Steel, corrosion resisting

Regulation Type:

Manual single stage

Manual Control Method:

Screw

Valve Stem Design:

Single seat

Outlet Pressure Setting:

610.0 pounds per square inch

Filter:

Not included

Temperature Rating:

Between -65.0 degrees fahrenheit and 225.0 degrees fahrenheit

Fsc Application Data:

Pneumatic system, aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A21100
