| Bonnet Attachment Method:          |
|------------------------------------|
| Integral                           |
| Flange Shape:                      |
| Round 1st end                      |
| Connection Type:                   |
| Flange 1st end                     |
| Features Provided:                 |
| Bonnet packing                     |
| Voltage In Volts And Current Type: |
| 26.0 dc                            |
| Outside Diameter:                  |
| 2.625 inches 1st end               |
| Face To Face Distance:             |
| 3.062 inches                       |
| Flange Face Design:                |
| Raised straight 1st end            |
| Special Features:                  |
| Indicator, position 1              |
| Material:                          |
| Steel body                         |
| Style Designator:                  |
| Straight through flanged ends      |
| Shelf Life:                        |
| N/a                                |
| Unit Of Measure:                   |
|                                    |
| Demilitarization:                  |
| No                                 |
| Fiig:                              |
| A046b0                             |
|                                    |
|                                    |
|                                    |
