Flow Control Device Normal Operation Position:

Open

Maximum Operating Temp:

185.0 degrees fahrenheit single response

Current Rating In Amps:

1.000

Valve Operation Method:

Manual or electric motor

Criticality Code Justification:

Feat

Voltage In Volts And Current Type:

32.0 dc

Special Features:

Flight safety critical

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A046b0
