**Flow Control Device Normal Operation Position:**

Open

**Maximum Operating Temp:**

185.0 degrees fahrenheit single response

**Current Rating In Amps:**

1.000

**Valve Operation Method:**

Manual or electric motor

**Criticality Code Justification:**

Feat

**Voltage In Volts And Current Type:**

32.0 dc

**Special Features:**

Flight safety critical

**Media For Which Designed:**

Fuel/oil, hydrocarbon single response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A046b0
