Special Features:

3 port compensator body; 0.750 in. Size; 25 gpm flow rate; designed for use with mil-h-46170 hydraulic fluid filtered to 25 microns ; maximum operating pressure 3000 psi; maximum operating temperature 176.0 degrees f; solenoid operated; 0-12 vdc voltage; materials: body, cast iron per bs1452; internal parts, carbon steel per bs 970 (british); seals, fluorocarbon (viton) commercial grade

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A506h0
