**End Application:**

COMP-ON-ENT-PART

**General Description:**

Valve located in suction line; electronic control mounted in condensing control unit control panel; temperature sensing probe to sense representative return or discharge air; regulates temperature by modulating flow of refrigerant in evaporator suction line; case temp precision control plus, minus one degree fahrenheit by solid state electronics

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
