| Current Rating In Amps:            |
|------------------------------------|
| 0.160                              |
| Valve Operation Method:            |
| Solenoid                           |
| Voltage In Volts And Current Type: |
| 120.0 ac                           |
| Phase:                             |
| Single                             |
| Frequency In Hertz:                |
| 60.0                               |
| Shelf Life:                        |
| N/a                                |
| Unit Of Measure:                   |
|                                    |
| Demilitarization:                  |
| No                                 |
| Fiig:                              |
| A046b0                             |
|                                    |
