| Tempurature Rating:                            |
|--|
| -29.0 degrees celsius and 65.0 degrees celsius |
| Current Type:                                  |
| Ac   |
| Body Length:                                   |
| 24.000 inches                                  |
| Body Width:                                    |
| 38.000 inches                                  |
| Body Height:                                   |
| 39.000 inches                                  |
| Environmental Protection:                      |
| Submersible                                    |
| End Application:                               |
| Valves, powered                                |
| Shaft Rotation Direction:                      |
| Clockwise                                      |
| Drive Type:                                    |
| Gear   |
| Duty Cycle:                                    |
| Continuous                                     |
| Output Drive Torque Rating:                    |
| 180.0 foot-pounds                              |
| Limit Switch Control:                          |
| Not included                                   |
| Manual Override:                               |
| Not included                                   |
| Voltage In Volts:                              |
| 440.0  |
| Phase:   |
| Three  |
| Frequency In Hertz:                            |
| 60.0   |
| Shelf Life:                                    |
| N/a  |
| Unit Of Measure:                               |
|  |
| Demilitarization:                              |
| No   |
| Fiia:  |
