**Maximum Operating Temp:**

1500.0 degrees fahrenheit single response

**Valve Operation Method:**

Electric motor

**Connection Type:**

Flange all ends

**Maximum Operating Pressure:**

30.0 pounds per square inch single response

**Criticality Code Justification:**

Feat

**Special Features:**

Items are being coded as critical to insure source inspection will be performed at the point of manufacture, prior to material receipt by the us navy or other dod components. These items are piece parts or end items in support of vital military hardware necessary to sustain the successful mission of the ships, submarines, and shore stations of the us navy. Critical features including, but not limited to, dimensions, tolerances/clearances, electronic characteristics, and metallurgical properties will bespecified for government q ar (quality assurance representatives) to insure the highest possible degree of quality and reliability of these parts being delivered under navicp contracts

**Material:**

Steel comp 316 flow control device

**Material Specification:**

Astm a351 assn standard single material response flow control device

**Media For Which Designed:**

Air single response

**Style Designator:**

Err-090

**Supplementary Features:**

With 115v oper-manual override

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A046b0
