Maximum Operating Temp:

1500.0 degrees fahrenheit single response

Valve Operation Method:

Electric motor

Connection Type:

Flange all ends

Maximum Operating Pressure:

30.0 pounds per square inch single response

Criticality Code Justification:

Feat

Special Features:

Items are being coded as critical to insure source inspection will be performed at the point of manufacture, prior to material receipt by the us navy or other dod components. These items are piece parts or end items in support of vital military hardware necessary to sustain the successful mission of the ships, submarines, and shore stations of the us navy. Critical features including, but not limited to, dimensions, tolerances/clearances, electronic characteristics, and metallurgical properties will bespecified for government q ar (quality assurance representatives) to insure the highest possible degree of quality and reliability of these parts being delivered under navicp contracts

Material:

Steel comp 316 flow control device

Material Specification:

Astm a351 assn standard single material response flow control device

Media For Which Designed:

Air single response

Style Designator:

Err-090

Supplementary Features:

With 115v oper-manual override

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A046b0
