End Application:

Hemtt family (heavy expanded mobility tactical trucks); 2320-01-304-2277 pls (palletized loading system)

Pressure Rating:

4000.0 pounds per square inch

Criticality Code Justification:

Feat

Special Features:

Weapon system essential; requires grove flange p/n 7-445-040646 when using the grove valve on the hemtt, grove flange is not required is used on the rt875cc rough terrain vehicle

Material:

Aluminum

General Description:

Inlet connection quantity type 4; outlet connection quantity type 2; maximum operating pressure 4000.0 psi; inlet valve provided; maximum pressure indicating device type: relief valve

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
