View Online at https://aerobasegroup.com/nsn/4810-01-443-3386	
Thread Direction:	
Right-hand all ends	
Flow Control Device:	
Disk	
Flow Control Device Normal Operation Position:	
Open	
Maximum Operating Temp:	
100.0 degrees fahrenheit single response	

**End Application:** 

**Connection Style:** 

**Connection Type:** 

**Mounting Position:** 

0.500 inches all ends

0.160

Solenoid

Horizontal

**Thread Size:** 

120.0 ac

Phase: Single

60.0 Material:

Err-090

Npt all ends

1.750 inches

**Special Features:** 

Frequency In Hertz:

Stainless steel body

Air single response Style Designator:

Media For Which Designed:

**Thread Series Designator:** 

**Current Rating In Amps:** 

**Valve Operation Method:** 

Threaded internal pipe all ends

**Maximum Operating Pressure:** 

**Voltage In Volts And Current Type:** 

Incl electric actuator, direct operated

**Center To Center Distance:** 

450.0 pounds per square inch single response

Strategic sealift conversion ships class

G9 plain, optional en (pipe) all ends
