Body Material:

Aluminum alloy or steel, corrosion resisting

Body Style:

Straight through w/offset

Furnished Items:

Nut

Media For Which Designed:

Air

Flow Control Device:

Poppet

End Connection Quantity:

2

Mounting Facility:

Bolts

Regulation Type:

Automatic single stage

Valve Loading Method:

Bellows

Maximum Inlet Pressure Rating:

275.0 pounds per square inch

Outlet Pressure Accuracy Rating:

0.400 pounds per square inch

Filter:

Included

End Application:

C-17

Temperature Rating:

Between -77.0 degrees fahrenheit and 165.0 degrees fahrenheit

Product Name:

Valve, regulator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A21100
