Flow Control Device:

Disk

End Application:

Nha york compressor p/n 222-22-222-119, 364-29065-001 and 364-42702-001

Valve Operation Method:

Solenoid

Voltage In Volts And Current Type:

110.0 ac

Phase:

Single

Special Features:

Manufacturers suggested name is valve, control, capacity, solenoid, for york r series reciprocating cylinder compressor; end connections - 2 connectors 1/8 inch, 27 npti threads; material is plate steel; 6 1/4 inch in diameter; media is hydraulic lubricating oil

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A046b0
