Tempurature Rating:

-40.0 degrees fahrenheit and 150.0 degrees fahrenheit

Current Type:

Ac

End Application:

Tank level indication system p/n 901-wmec-437-001 onboard 270a & 270b wmec coast guard vessels

Manual Override:

Included

Voltage In Volts:

120.0

Phase:

Single

Special Features:

8 turns electric actuator for modulating service with a capacity type reversible electric motor, electro-mechanical brake, heater, gear train limit switches and terminal block in die cast nema 4 aluminum enclosure; motor furnished with self resetting thermal switch to protect motor for overload; gear train shall be designed to withstand the actual stall torque, and shall be hardened alloy steel, permanently lubricated; two adjustable cam actuated end travel limit switches shall be provided to control direction of travel; actuator shall be equipped with a handwheel for manual override; actuator torque shall be 600 inch-pound and speed to open/close valve shall be not more than 8 sec per turn; position of actuator shall be controlled by pc-2000aio card; card shall generate 4-20ma to indicate position & accept 4-20ma to set position

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A30500
