**Flow Control Device:**

Disk

**Flow Control Device Normal Operation Position:**

Closed

**Valve Operation Method:**

Electric motor or manual

**Connection Type:**

Flange all ends

**Mounting Position:**

Horizontal

**Special Features:**

3/4" pipe size, 3/4" port, 2-way fully electric rotary shaft type valve; has monel inner parts; 120 volts; has watertight actuator enclosure and terminal block in separate external enclosure; horizontal pipe mounting, upright actuator; flanged ends per class 150 mil-f-20042; continuous duty, class h molded coil with locking device with manual operator knob to hold valve in manually overridden position

**Frequency In Hertz:**

60.0

**Material:**

Copper alloy 922 body

**Furnished Items And Quantity:**

1 switch and 1 locking device

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A046b0
