Body Material:

Steel, stainless

Overall Height:

15.750 inches

Pressure Rating:

900.0 pounds per square inch

Features Provided:

Manual override and by-pass valve and relief valve

Design Characteristics:

Double acting single cylinder

Product Name:

Model 7800 actuator, double acting piston driven ball helix valve actuator

Special Features:

Actuator has differential handwheel override; 4 spdt switches, 2 open & 2 closed; port connections sae-6 o-ring; fluid capacity per stroke 53 cu. In.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A34200
