Valve Discharge Flow Rate:

7.9 gallons per minute

Valve Operation Method:

Solenoid

Features Provided:

Subplate mounted and manual override

Voltage In Volts And Current Type:

12.0 dc

Special Features:

4-way proportional directional control valve, direct operated; with removable coil; without integrated electronics; covered manual override; buna-n seats suitable for petroleum oils; a terminal box that both solenoids plug into to provide a central wire connection spot

Frequency In Hertz:

24.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A506h0
