Flow Control Device Normal Operation Position:

Closed

End Application:

Gfe procurement lha/lhd classes

Current Rating In Amps:

5.000

Valve Operation Method:

Solenoid

Voltage In Volts And Current Type:

110.0 ac

Product Name:

Valve assembly, pinch; inavy: pinch valve

Special Features:

Next higher assembly: 6640-01-491-9330 auto blood glycer-/deglycerolization system (cell washing machince) model acp 215, used on machines sold beginning 2001

Frequency In Hertz:

50.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A046b0
