Directional Control Linear Valve - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4810-01-602-9208

Valve Operation Method:
Solenoid
Voltage In Volts And Current Type:
24.0 dc
Product Name:
Solenoid operated directional valve
Special Features:
Ambient temperature range is 20 degrees celsius to 70 degrees celsiu (-4 degrees fahrenheit to + 158 degrees fahrenheit); to obtain
optimum service life from both fluid and hydraulic system, 65 degrees celsius(150 degrees fahrenheit) is the recommended fluid
temperature, except for water-containing fluids; ensure that fluid viscosities stay within the limits specified in hydraulic fluids
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A506h0
