**Flow Control Device Normal Operation Position:**

Closed

**End Application:**

F105 frigate galley

**Valve Operation Method:**

Solenoid

**Valve Size:**

2.0 inches

**Voltage In Volts And Current Type:**

230.0 ac

**Product Name:**

Normally colsed ball valve

**Frequency In Hertz:**

50.0 and 60.0

**Material:**

Rubber ethylene-propylene class epm

**Material Specification:**

40 percent talc filled polyproylene mfr ref single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A046b0
