Flow Control Device:

Disk

Flow Control Device Normal Operation Position:

Closed

Valve Operation Method:

Electric motor

Connection Type:

Threaded internal pipe all ends

Voltage In Volts And Current Type:

24.0 dc

Special Features:

Disc material bunan; fluids hot liquid

Media For Which Designed:

Liquid single response

Style Designator:

Straight thru

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A046b0
