**End Application:**

F-4e/ef-4c aircraft

**Valve Operation Method:**

Automatic

**Criticality Code Justification:**

Agav

**Special Features:**

Ymanufacturers suggested name is valve-absolute pressure reducer and relief; ambient temp -65 to +275 degrees feh; fluid -65 to +400 degrees feh; operating pressure 290 psia; proof 580 psia min; burst 1160 psia min; 2 ports, inlet and outlet

**Material:**

Steel comp 440c seat

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A046b0
