End Application:

F-4e/ef-4c aircraft

Valve Operation Method:

Automatic

Criticality Code Justification:

Agav

Special Features:

Ymanufacturers suggested name is valve-absolute pressure reducer and relief; ambient temp -65 to +275 degrees feh; fluid -65 to +400 degrees feh; operating pressure 290 psia; proof 580 psia min; burst 1160 psia min; 2 ports, inlet and outlet

Material:

Steel comp 440c seat

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A046b0
