Thread Direction:

Right-hand all ends

Flow Control Device:

Disk

Maximum Operating Temp:

200.0 degrees fahrenheit single response

Connection Style:

Plain, optional end (pipe) all ends

Valve Operation Method:

Automatic

Connection Type:

Threaded internal pipe all ends

Mounting Position:

Horizontal or vertical

Thread Size:

1.500 inches all ends

Material:

Copper alloy 836 body

Material Specification:

Qq-c-390 federal specification single material response body

Media For Which Designed:

Fuel/oil, hydrocarbon single response

Style Designator:

Straight thru

Thread Series Designator:

Npt all ends

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
