Flow Control Device:

Disk

Bonnet Type:

Outside screw-yoke

Bonnet Attachment Method:

Bolted

Valve Operation Method:

Manual

Flange Shape:

Round 1st end

Connection Type:

Flange 1st end

Features Provided:

Bonnet packing

Outside Diameter:

7.687 inches 1st end

Face To Face Distance:

12.000 inches

First Connection Face To Centerline Distance:

6.000 inches

Flange Face Design:

Raised straight 1st end

Style Designator:

Cross flanged ends

Reference Number Differentiating Characteristics:

As modified by cross valve size 4 in.Undrilled flange

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A046b0
