## NSN 4820-00-276-9010

Cross Valve - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4820-00-276-9010

Flow Control Device:
Disk

Bonnet Type:
Outside screw-yoke

Bonnet Attachment Method:
Bolted

Valve Operation Method:
Manual

Flange Shape:
Round 1st end

Connection Type:

**Features Provided:**Bonnet packing

Flange 1st end

Outside Diameter:

7.687 inches 1st end

Face To Face Distance:

12.000 inches

**First Connection Face To Centerline Distance:** 

6.000 inches

Flange Face Design:

Raised straight 1st end

Style Designator:

Cross flanged ends

**Reference Number Differentiating Characteristics:** 

As modified by cross valve size 4 in. Undrilled flange

Shelf Life:

N/a

**Unit Of Measure:** 

**Demilitarization:** 

No

Fiig:

A046b0
