Cross Valve - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4820-00-276-9010

Flow Control Device:
Disk

Bonnet Type:
Outside screw-yoke

Bonnet Attachment Method:
Bolted

Valve Operation Method:
Manual

Flange Shape:
Round 1st end

Connection Type:

Features Provided:Bonnet packing

Flange 1st end

Outside Diameter:

7.687 inches 1st end

Face To Face Distance:

12.000 inches

First Connection Face To Centerline Distance:

6.000 inches

Flange Face Design:

Raised straight 1st end

Style Designator:

Cross flanged ends

Reference Number Differentiating Characteristics:

As modified by cross valve size 4 in. Undrilled flange

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A046b0
