Thread Direction:

Right-hand 1st end

Flow Control Device:

Poppet

Disk Loading Method:

Spring

Maximum Operating Temp:

275.0 degrees fahrenheit single response

Connection Style:

Plain (pipe) 1st end

Valve Operation Method:

Automatic

Connection Type:

Threaded external pipe 1st end

Thread Size:

0.250 inches 1st end

Opening Pressure Setting:

1000.0 pounds per square inch

Material:

Copper alloy body

Style Designator:

Straight through note: to be used for valve bodies of one section only.

Thread Series Designator:

Npt 1st end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
