**Body Material:**

Copper alloy

**Outside Surface Treatment:**

Any acceptable

**Tempurature Rating:**

250.0 degrees fahrenheit

**Media For Which Designed:**

Refrigerant 12

**First End Connection Type:**

Unthreaded external tube

**Second End Relationship With First End:**

Identical

**End Connection Quantity:**

2

**Valve Expansion Control Type:**

Pressure

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A07100
