**End Application:**

Trailer, oxygen cylinder

**General Description:**

Material is stainless steel 303; 5000.0 psig operating pressure; 10000 psig proof pressure; 20000 psig burst pressure; m20 to 250 degree f operating temperature; 0.170 inch diameter of orifice; 6 turns full open to full closed; 0.35 cv water factor at 60 degree f; 1.13 n.M average seat torque at 10 in. Lb operating pressure; 1.750 inch face to face distance

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
