Flow Control Device:

Disk

Bonnet Type:

Outside screw-yoke

Bonnet Attachment Method:

Threaded

Thready Qty Per Inch (tpi):

10 1st end

Thread Size:

1.500 inches 1st end

Criticality Code Justification:

Zzzy

Material:

Nickel alloy flow control device

Thread Series Designator:

Uns 1st end

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A046b0
