Flow Control Device:

Disk

Bonnet Type:

Inside screw

Bonnet Attachment Method:

Threaded

Maximum Operating Temp:

200.0 degrees fahrenheit single response

Connection Style:

G60a plain (tube) all ends

Valve Operation Method:

Automatic

Connection Type:

Unthreaded external tube all ends

Opening Pressure Setting:

300.0 pounds per square inch

Outside Diameter Tube Accommodated:

0.875 inches all ends

Material:

Copper alloy body

Media For Which Designed:

Refrigerant 12 single response

Style Designator:

C1 angle

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A046b0
