Thread Direction:

Right-hand 1st end

Flow Control Device:

Poppet

Connection Style:

G9 plain, optional en (pipe) 1st end

Valve Operation Method:

Automatic

Connection Type:

Threaded internal pipe 1st end

Thread Size:

0.500 inches 2nd end

Opening Pressure Setting:

1100.0 pounds per square inch

Special Features:

Cracking pressure 150 psi; o-ring viton material

Material:

Steel comp 316 body

Material Specification:

Qq-s-763 federal specification single material response body

Style Designator:

Err-090

Thread Series Designator:

Npt 1st end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
