Body Material:

Brass

Second End Relationship With First End:

Identical

Seat Material:

Nickel copper alloy

Flow Control Device:

Disk

End Connection Quantity:

2

Outlet Pressure Setting:

150.00 pounds per square inch

Special Features:

Magnetic permeability shall not exceed 2.0 after fabrication

Reference Number Differentiating Characteristics:

Magnetic permeability shall not exceed 2.0 after fabrication

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A21100
