End Application:

A-6c acft

Valve Operation Method:

Automatic or manual

Power Drive Operating Pressure:

20.0 pounds per square inch

Special Features:

Components consist of valve housing, rotating-type shutoff element, seals and support provisions, a spring to drive the valve into a closed position, item operates in aircraft fuels, air and fuel vapors, it will endure a total of 10, 000 operating cycles, minium life service 15 yrs, satisfactory operation at ambient temps of -65 f to +160 f, fluid temp range of -65 f to +135 f

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
