Body Material:

Steel

Body Style:

Tee

Media For Which Designed:

Water

Flow Control Device:

Needle

End Connection Quantity:

2

Valve Loading Method:

Spring

End Application:

Valve, regulating, water

Criticality Code Justification:

Feat

Product Name:

Inavy): valve, water regulating; drawing: 3 in condenser water regulator marine service-high water refrigerant pressure actuated (freon 12)

Special Features:

Items are being coded as critical to insure source inspection will be performed at the point of manufacture, prior to material receipt by the us navy or other dod components. These items are piece parts or end items in support of vital military hardware necessary to sustain the successful mission of the ships, submarines, and shore stations of the us navy. Critical features including, but not limited to, dimensions, tolerances/clearances, electronic characteristics, and metallurgical properties will bespecified for government q ar (quality assurance representatives) to insure the highest possible degree of quality and reliability of these parts being delivered under navicp contracts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A21100
